

# FLASH CS4

Name: \_\_\_\_\_

## Intro Videos

### Video 1

#### Using the workspace

1. If the panels in your workspace ever get moved or screwed up how do you get back to the default layout?
2. The white “page” or area on the screen is better known as the \_\_\_\_\_ in flash. What are some ways it can be changed?

### Video 2

#### Understanding the timeline, keyframes and frame rate

1. How many layers can the timeline contain? What is a nice way to organize an animation with lots of layers?
2. Describe how to create a new layer?
3. Describe Onion Skinning? Why might it be useful?
4. Describe the significance of keyframes

### Video 3

#### Motion Tween

1. What is the general rule of motion tweens?
2. Outline the steps to create a motion tween
3. Besides moving an object around the stage, what else can a motion tween do?
4. What does the motion tween ease in and out feature do?
